About Us

UltraMax is an Indian conglomerate operating as a consortium of various commercial entities under one corporate group. The company operates in diverse sectors such as construction chemicals, wall decor, and wood supplies.

Under construction chemicals, UltraMax introduced Power++, a concrete admixture. This exceptional product, crafted using raw materials sourced from American technology and the company's proprietary chemicals, enhances its effectiveness. UltraMax has set an example by becoming the number 1 Power++ producer. As an autonomous body, we made significant progress in swiftly implementing our robust business plans. Our ground-level work aimed at creating a top-notch product from locally sourced raw materials can assist the common man in building his dream home.

In the field of construction chemicals, UltraMax introduced Power++, a concrete admixture. Crafted with raw materials sourced from American technology and the company's proprietary chemicals, this outstanding product showcases our expertise. UltraMax, by using advanced technology and confidential chemicals, has set a remarkable precedent as the number 1 Power++ producer.

Having achieved excellence in our primary technology, we regularly update ourselves with all the latest developments in history. We meticulously attend to every detail related to distribution and promotion that can help enhance sales. We leave no stone unturned in providing efficient logistic solutions for all our products.

Our strong collaboration with business partners and dedicated customer support has paved the way for our products to shine in the market. We strive to build long-term relationships with our customers and don't rest until they are satisfied with our products.

JK SHIELDMAX PAINTS PVT LTD

VISION AND MISSION

Vision and Mission

To become India's largest and most cost-effective supplier of construction materials; white cement, putty, liquid chemicals. Industries prefer Ultramix as their favorite supplier of wall putty, white cement, and liquid chemical-based products.

After years of hard work and dedication to progress, our modest success has given us enough confidence to face significant challenges. At Ultramix, we are ready to make significant progress with our 'vision' as our guiding light.

Water Proof

- Pure White Colour
- Great Covering
- Excellent Finishing
- Easy To Apply
- Both Inside And Outside
- Amazing Result On The Wall

YOUR OWN TRUSTY PUTTY

This white cement is a unique blend of high-quality chemicals and polymer polymer. It not only strengthens the walls but also keeps them protected from moisture and sealing.

This white cement is a unique blend of high-quality chemicals and polymer polymer. It not only strengthens the walls but also keeps them protected from moisture and sealing.

Ultra Max Wall Putty covers 18 to 20 square feet in 2 coats with a maximum thickness of 1.5 mm on a smooth plaster surface. The spreading capacity depends on the wall surface.

- Great Covering
- Excellent Finishing
- Easy To Apply
- Both Inside And Outside
- Amazing Result On The Wall

Cost 25 paise/sqft
Promise of durability
Cost of painting Work

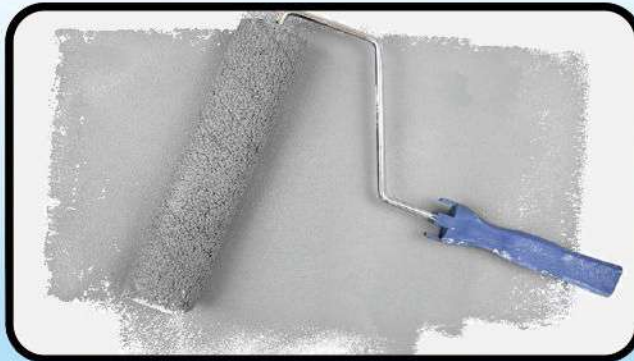

JK SHIELDMAX PAINTS PVT LTD

For optimal results, use Ultra Max; mix it with 200 ml of water per bag and 50 kg of cement. It is commonly used in China, plastering, slabs, columns, floors, etc. Its application reduces the likelihood of leakage in buildings, helps prevent seepage during heavy rainfall, and proves beneficial in preventing cracks

ULTRA MAX POWER++ is used from foundation to roof slope.

AVAILABLE IN 1 LTR, 5LTR, 10 LTR, 20 LTR

For optimal results, mix 01 liter of Ultra Max U.R.P. (Universal Repair Product) with twice the amount of cement and three times the amount of water. Apply the mixture with a brush, coating the surface twice. This solution effectively prevents leaks, fungus, papering, and minor cracks. One liter of Ultra Max U.R.P. covers an area of 50 square meters and is available in a convenient 20-liter packaging. In cases where sealing is excessive, U.R.P. is applied as a coating without mixing it with cement. U.R.P., in its full form, is a unique repairing product.

JK SHIELDMAX PAINTS PVT LTD also manufactures Putty Plus. The use of Putty Plus makes it water-resistant, and it provides a larger coverage area for the putty.

JK SHIELDMAX PAINTS PVT LTD manufactures Silicon-Based Hardnor, primarily used in the production of paving, blocks, cement, and bricks. It reduces the cement setting time and decreases the water content in cement by up to 25 to 30 percent, resulting in increased strength and workability of concrete. It can also be used in areas with reinforced concrete. The recommended dosage is 50 kilograms per bag of cement, with a usage range of 200 to 400 grams.

The quality of this product surpasses others, enhancing strength and reducing setting time. It provides a superior finish, making it suitable for tiles used in areas like petrol pumps and roads with heavy vehicle traffic.
